Notes on Ordering a Fireplace Surround:

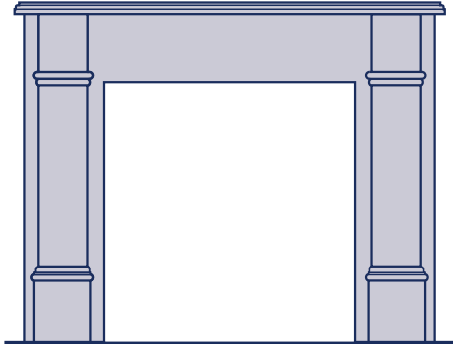

- 1) As our Fireplace surrounds are made of timber and are therefore combustible, the following clearances from the Firebox need to be observed.
 - a) Side: 100mm either side minimum.
 - b) Top: 200mm minimum
- 2) Once you have ordered your Fireplace Surround, we will perform a site measure*, prior to manufacture. In the cases of a new installation, this needs to be done after the opening for the fire has been formed and other works have been completed.
- 3) To ensure that ordering a Fireplace Surround is as easy as possible, we are happy to liaise with your builder or supplier of Fireplace.

*Site measures are offered to clients in Auckland only.

The fireplace surrounds shown below are popular styles often found in traditional homes. We can also make any fireplace surround to suit your own tastes or specifications. For fireplaces that fall within certain dimensions, our standard pricing applies: Height of opening: 800-1000mm; Width of opening 900-1200mm.
